GBM-S DC motor with double shaft

Ensure reliable performance in a compact design: The Bosch gearless motors excel at durability, robustness and high speeds at the lowest noise levels. Decades of experience in manufacturing of electric motors have led to the latest Bosch gearless motor generation which has proven million fold. They can be used for industrial applications in 12 or 24V.

- **Degree of protection:** IP 10
- **Operating mode:** S1
- **Nominal voltage:** 24 V

Additional information

Technical data and performance curve

Nominal power (W): 300

Nominal current (A): 9,5

Nominal speed (rpm): 4500

Nominal torque (Nm): 0,33

Stall torque (Nm): 2

Hall Sensor: No

Features and benefits

- Different power densities available: To meet customer requirements in terms of efficiency
- High standards in production and testing: For proven quality and a long service life
- Production in line with the original automotive quality guidelines: For proven quality, high reliability and a long service life
- Available hall sensor: For positioning or direction of speed feedback
